Ms. (b) (6)
Colbert Domestic Well Sampling Committee
(b) (6)
Colbert, WA 99005

Dear Committee Member:

Recent events have altered the membership of the committee and heightened its profile in relation to drinking water supply sampling around the Colbert Landfill. As a result, the committee is evaluating its role. Ecology suggests the committee consider the following objectives:

- * review sampling protocols and reporting procedures and make recommendations to the county
- * assist the county in maintaining a reliable process by which wells are scheduled for testing
- * assist the county in determining a reliable process by which wells are taken off the testing schedule
- * provide an avenue for complaints or concerns from the impacted community regarding the sampling program

We believe the overall goal of the committee is to help the county ensure a safe drinking water supply for the community impacted by the contaminant plume(s). When you believe the county has procedures in place which will meet this goal, please notify me so I can release the grant monies for this project.

If you have any questions or would like additional information, please do not hesitate to contact me at (206) 438-3079. If you believe it beneficial for me to meet with you I would be happy to do so.

Sincerely,

Michael Kuntz
